Save-On-Security.com

For this site, they need a full ecommerce system that allows them to be able to sell their products online. The site needs to be customized with our shopping cart system which will be tailored to this site. You can access the save-on-security site and upload to the following account on our server:

Control panel login: www.websitesettings.com (you can access / create DB here)

FTP: <ftp1.ftptoyoursite.com>

Username: saveon

Password: secu5678

Access URL: <http://www.save-on-security.com.php5-7.websitetestlink.com/index.php>

For the shopping cart system, you can look at the site:

<http://www.myhallmarkstore.com.php5-7.websitetestlink.com/index1.php>

username: myhall

password: mark1234

control panel access: www.websitesettings.com

FTP: <ftp1.ftptoyoursite.com>

Once you have downloaded the shopping cart, you can proceed as follows:

1. Integrate the shopping cart in to Save-On-Security design and customize look (up to some extent) using the CSS available on the site.
2. Insert Paypal Payments option
3. Integrate www.psigate.com API to accept credit card payments through the site
4. Ensure functionality once all the above are completed

If there are any questions, I will be online.
