

*“Smart Stove” technology monitors the kitchen cooking area.
Power to the stove is shut off when Unattended Cooking is detected.*

Designed to monitor persons with early-stage Alzheimer’s, PTSD, or other cognitive disorders.

Occupational Therapists and Home Care Workers across North America who work with Alzheimer’s sufferers and other forgetful people praise *Stove Guard’s* effectiveness. *Stove Guard* is the solution they use to help their “Aging at Home” clients live independently. It allows people, who otherwise may have to be institutionalized, remain in their own homes safely longer.

Seniors housing managers use *Stove Guard* to provide an extra level of security & safety for their residents.

Fire marshals have tested *Stove Guard* and they endorse it’s use as an effective fire prevention tool.

Simple to use, *Stove Guard* is factory-set to turn off the stove one minute after last sensing motion in the kitchen cooking area. The shutdown time is adjustable to best suit the user’s needs.

Installation is an easy retrofit for most homes, using existing 4-prong “plug-in” connection. Models are available for electric stoves, electric cook tops and now for GAS stoves. *Stove Guard* is patented and certified for use in Canada and the USA.

*Unattended Cooking is the #1
Cause of Household Fires*

Stove Guard

Protect Your Family & Home

Easy to Install & Use

- Constantly monitors the kitchen cooking area
- Detects Unattended Cooking & Shuts off power to the stove
- Continues monitoring & automatically resets when the user returns to the cooking area
- No user input is required
